DETAILED ACTION

Allowable Subject Matter

Claims 1, 2, 5, 6, 11-16, 25-42 are allowed.

Examiner's Statement of Reason for allowance

1. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record, *Vance et al* (US 6442526) teaches a method (and corresponding system and computer readable medium) of providing account reconciliation for an account comprising the steps of: matching, at a processor, a first charge to a first amount of a travel record in a travel database, wherein a department code (*reference or identifying code or number*) is associated with said travel record in said travel database, and wherein said travel record includes said first amount and first data, wherein said first data relates to non monetary information; and assigning, by said processor, said first charge to said department code by writing said departmental code to a field corresponding to said first charge in said financial database; associating, by said processor, a second charge in said financial database with said first data of said travel record in said travel database, and wherein said second charge is associated with a change to said travel record (see figs. 16I and 17 ele. 1700-1750, col. 13, lines 36 through col. 14, lines 65; col. 2, lines 1-3).

Vance further teaches ticket tracking process that reports on status of any ticket, lists tickets that have been refunded or voided, list tickets returned for refund which have not been credited, and reports unrefunded tickets (col. 10, lines 27-35).

Art Unit: 3691

Dunn et al (US 5134564) teaches selecting or rejecting by either human intervention or by automatic processing a probable match for unmatched records. For each probable match accepted, the accepted match pair, including a record from a first list and a record from the second list, is then removed from further processing. The probable matching steps are repeated until all acceptable probable matches have been determined. Thereafter, if unmatched records exist in the first list, further processing continues. For example, if no probable match exists, it may be determined that the lack of a likely match results from the omission of a record in the second list and the match can be made by insertion of a corresponding record in the second list so that a matched pair in the first and second list results. For example, such a record insertion often is necessary in a customer listing to correspond with a service charge in the first listing from a bank statement (col. 3, line 52 through col. 4, line 26).

Vance and Dunn fail to teach a method of providing account reconciliation for an account comprising: *associating, by said processor, a second charge in said financial database with a first data of a travel record in a travel database, wherein said travel record in said travel database does not include said second charge in said financial database, and wherein said second charge in said financial database is associated with a change to said travel record in said travel database; and assigning, by said processor, said second charge in said financial database to said department code associated with said travel record in said travel database.*

Art Unit: 3691

For this reason, claims 1, 11, and 25 are deemed to be allowable over prior art of record. Claims 2, 5, 6, 12-16, 26-42 are deemed allowable by dependency.

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reason for Allowance".
